Office of the President
The Rockefeller Institute
York Avenue
New York, New York 10021

Dear Sir:

I wish to advise you of the death of my father, Dr. Jacob Furth. Dr. Jacob Furth died in his sleep on July 22, 1979, at the age of 83, of a myocardial infarction in Surry, Maine. As you know, he was a nationally and internationally recognized scientist who made many scientific contributions in the areas of cancer research, experimental pathology, and endocrinology. His national and international awards are too numerous to mention at this time.

If you desire any further information please contact me.

Sincerely,

Eugene D. Furth, M.D.
Professor & Chairman
Department of Medicine
